

Reference measurement methods/procedures no longer listed in the JCTLM Database

Analyte	Reference measurement method/procedure	Applicable matrice(s)	Measurement principle/technique	Reference(s)	Comment(s) from method/procedure developer/owner	Date removed from JCTLM lists
protein	Total serum protein, NRSCL RS5-A2	human serum	Biuret reaction	NRSCL RS5-A2	<p>The National Reference System for the Clinical Laboratory (NRSCL) document RS5-A2 is no longer maintained in the consensus process by the Clinical and Laboratory Standards Institute (CLSI). Please refer to <i>Clin. Chem.</i>, 1981, <b>27</b>, 1642 (for method development and validation), and <i>Clin. Chem.</i>, 1981, <b>27</b>, 1651 (for method transferability). Please note that the method involves the use of NIST SRM 927 (7% solution bovine serum albumin) which was accepted by the NRSCL Council in December 1980 according to criteria established for the acceptance of a CRM (See CLSI document NRSCL3-A).</p>	31 January 2013
