

## NMIJ/AIST Dosimetry Group Publications (2005-2007)

T. Kurosawa and N. Takata, "Correction factors for free-air ionization chambers for X-rays", CCRI(I)05-27 (2005).

A. Nohtomi, N. Takata and C. Kasige, "A correction for scattered x-ray contribution in air kerma calibration", CCRI(I)05-29 (2005).

T. Kurosawa, N. Takata and Y. Koyama, "Monte carlo simulation of electron-loss and scattering correction factor for parallel-plate free-air chambers", KEK-International **2005** (3) 230-236 (2005).

N. Takata, T. N. Toan, K. Eunjoo, M. Pujadi, T. Kurosawa and Y. Koyama, "Loss of Ions in Cavity Ionization Chambers", Appl. Rad. Isotopes **63**, 805-808 (2005).

T. Kurosawa and N. Takata, "Estimation of Electron-loss and Photon-scattering Corrections for Parallel-plate Free-air Chambers", J. Nucl. Sci. Tech. **42** (12) 1077-1080 (2005).

M. Kato, Y. Morishita, F. Koike, S. Fritzsche, H. Yamaoka, Y. Tamenori, K. Okada, T. Matsudo, T. Gejo, I. H. Suzuki and N. Saito, "High-resolution absolute photoabsorption cross sections for Ne in the 1s2s and 1s2p resonant double excitation", J. Phys. B **39**, (8) 2059-2069 (2006).

T. Kurosawa, T. Matsumoto, Y. Morishita and N. Saito, "The influence of scattering photons from the x-ray filter for calibrations", Proceeding of The Second Asian and Oceanic Congress Radiological Protection 445-448 (2006).

M. Kato, A. Nohtomi, Y. Morishita, T. Kurosawa, N. Arai, I. H. Suzuki, N. Saito, "Development in the soft X-ray intensity measurement with a cryogenic radiometer", AIP Conference Proceedings **879**, 1133 (2007).

M. Kato, Y. Morishita, M. Oura, H. Yamaoka, Y. Tamenori, K. Okada, T. Matsudo, T. Gejo, I. H. Suzuki, and N. Saito, "Absolute Photoionization Cross Section with an Ultra-high Energy Resolution for Ne in the Region of 1s Rydberg States", AIP Conference Proceedings **879**, 1121 (2007).

A. Nohtomi, N. Takata and T. Sakae, "A Correction Factor for Effects of Scattered X-rays at Calibration of Ionization Chambers in Low Energy X-ray Standard Fields", Japanese Nuclear Science and Technology **44**, 1-5 (2007).

## NMIJ/AIST Dosimetry Group Publications (2003-2005)

- [1] N. Takata, Y. Koyama and T. Kurosawa, "Ionization chamber wall correction factors in measuring air kerma for gamma rays," J. Metrology Soc. of India (MAPAN), Vol. 18, 223-228 (2003).
- [2] N. Takata, T. Kurosawa and N. T. Tran, "Angle dependence of signal currents from cylindrical ionization chambers," Radiation Protection Dosimetry, Vol. 107, 293-296 (2003).
- [3] T. Kurosawa, N. Takata and Y. Koyama, "Angular dependences of responses of cylindrical cavity ionization chambers," CCRI(I)/03-17 (2003).
- [4] N. Takata, T. Kurosawa and Y. Koyama, "Ionization chamber wall correction factors and angular dependences of responses in measuring air kerma for gamma rays," CCRI(I)/03-18 (2003).
- [5] N. Takata, T. Kurosawa and N. T. Tran, "Wall correction factors and angle dependence of signal currents from cylindrical ionization chambers," Radiation Physics and Chemistry, Vol. 71, 743-744 (2004).
- [6] Y. Hino and N. Takata, "The present status of traceability of dosimetry and radioactivity standards," RADIOISOTOPES, Vol. 53, 51-57 (2004) (in Japanese)
- [7] P. J. Allisy-Roberts, D. T. Burns, N. Takata, Y. Koyama and T. Kurosawa, "Comparison of the standards of air kerma of the NMIJ and the BIPM for  $^{60}\text{Co}$   $\gamma$  rays," Rapport BIPM-2004/11 (2004).
- [8] P. J. Allisy-Roberts, D. T. Burns, N. Takata, Y. Koyama and T. Kurosawa, "Comparison of the standards of air kerma of the NMIJ and the BIPM for  $^{137}\text{Cs}$   $\gamma$  rays," Rapport BIPM-2004/12 (2004).
- [9] T. Kurosawa, N. Takata, Y. Koyama and M. Katou, "Establishment of gamma-ray air kerma standard," AIST Monograph of Metrology, No. 7 (2005) (in Japanese).
- [10] T. Kurosawa, N. Takata, and Y. Koyama, "Angular dependence of the wall correction factor for air kerma measurements using cylindrical cavity chambers", Applied Radiation and Isotopes, Vol. 62, 805-808 (2005).
- [11] Y. Morishita, N. Saito and I. H. Suzuki, "Comparison of the absolute soft X-ray intensity between a cryogenic radiometer and an ion chamber", J. Elect. Spectrosc. and Related Phenomena, Vol.144-147, 1071-1073 (2005).
- [12] M. Kato, "Survey on development and establishment of absorbed dose standards for beta radiation", AIST Bulletin of Metrology, vol.3, 633-642 (2005).
