

APMP TCPR Report to CCPR WG-CMC

September 7, 2023

Annette Koo

Harmonization of Photometry CMCs

All requested changes made and submitted to KCDB

Other notes of interest

TCPR held workshop on the CMC submission and review process in May 2022.

Number of reviewers is growing, participation and interaction with KCDB confidence is growing

The APMP TCEM combines on site peer review with RMO CMC approval – maybe this is a good way to go forward

The statistics from the KCDB delivered to the JCRB are difficult to make sense of. The statistics that I have access to as a TC chair are also not as useful as they could be.
