

14th CCM Meeting

February 2013

BIPM, Sevres

1. General Aspects

The EURAMET Mass and Related Quantities Technical Committee, TC-M, is characterized by the number of related quantities and by the diversity of techniques employed in the realization of the corresponding units. Nevertheless, nowadays there are two dominant issues, one is the redefinition of the kilogram, which has definitely determined the activities of some NMIs and is reflected in EURAMET projects, and the other one is the EMRP, where many institutes are collaborating very actively.

On the other hand, there has been an increase in the number of projects, especially for comparisons, in contrast with previous year when the number of projects was stopped.

2. Projects

In the period under review (May 2011 – January 2013) in TC area of the numbers of proposed, agreed and completed projects in the various categories are shown in the table below. The previous year's numbers are shown in brackets.

	Comparison	Research	Traceability	Consultation	Total
Proposed	3 (4)	2 (3)	1(0)	-	6 (7)
Agreed	21 (14)	8 (8)	2 (3)	-	31 (25)
Completed	48 (45)	37 (34)	7 (6)	15 (15)	107 (100)
Total	72(63)	47 (45)	10 (9)	15 (15)	144 (132)

The projects can be broken down by technical area as follows:

	Proposed	Agreed	Completed	Total
Density	2 (0)	2 (2)	9 (8)	13
Force	0 (2)	6 (7)	7 (5)	13
Hardness			1 (1)	1
Mass	2(0)	9 (7)	41 (39)	52
Pressure	2 (5)	13 (6)	42 (40)	57
Torque		0 (1)	2 (2)	2
Viscosity		0 (1)	5 (4)	5
Gravimetry		1 (1)	1 (1)	2

Three completed projects dealing with general issues were placed under mass for simplicity.

3. Comparisons

There are 34 registered European key comparisons in the area of Mass and Related Quantities (3 more than last period), of which 14 are active, 4 have provisional equivalence, 14 have been approved for equivalence and 1 has been published. Two were bilateral key comparisons between PTB (EURAMET) and CENAM (SIM). Details are provided in Table 1.

4. CMCs

Over the last year, 10 CMCs from other RMOs were reviewed.

As concerns EURAMET submissions, the following is an update since May 2011.

Submission	NMI	Field	CMCs	State
EURAMET.M.18.2010	EIM, Greece	mass	revision	published
EURAMET.M.22.2011	LNE, France	mass	new	published
EURAMET.M.23.2011	IMBIH, Bosnia and Herzegovina	mass	new	published
EURAMET.M.24.2011	CEM, Spain	torque	new	published
EURAMET.M.25.2011	CEM, Spain	mass	revision	published
EURAMET.M.26.2012	CMI, Czech Republic	force	revision	published
EURAMET.M.30.2012	DPM, Albania	mass	new	under revision
EURAMET.M.31.2013	PTB, Germany	pressure	new	under revision

5. Participation EMRP

TC Mass members are actively involved in EMRP call 2010 (area Industry) taking part in the following projects:

Number	Short name	Full Name
IND03	HIGHpress	High Pressure Metrology for Industrial Applications
IND05	MeProVisc	Dynamic mechanical properties and long-term deformation behaviour of viscous materials
IND09	Dynamic	Traceable Dynamic Measurement of Mechanical Quantities
IND12	Vacuum	Vacuum metrology for production environments

These projects started in the last term of 2011.

TC Mass members are actively involved in EMRP call 2011 (area SI Broader Scope) taking part in the following projects:

Number	Short name	Full Name
SIB03	KNOW	Realisation of the awaited definition of the kilogram - resolving the discrepancies
SIB05	NewKILO	Developing a practical means of disseminating the new kilogram

These new projects will provide very important results for the “new definition of the kilogram” and its practical realization.

For EMRP call 2012 (area SI Broader Scope) the following JRP has been selected:

Number	Short name	Full Name
SIB63	Force Metrology	Realisation of the awaited definition of the kilogram - resolving the discrepancies

It can be concluded that the participation at EMRP is rather successful because, although there are not many proposals, most proposals are always selected.

6. Meetings

The 2012 Mass and related quantities TC Contact Persons meeting was held in Vienna, Austria on 2nd March and more than 60 people attended to the meeting. As usual, it was preceded by technical meetings for the various subfields to review progress in projects in mass, force, pressure, density and viscosity. There were also other meetings related to EMRP projects in progress (IND09) and in negotiation

(SIB05) and a specific meetings for EURAMET project 1205 “Review of EURAMET cg 18”.

The 2013 Mass and related quantities TC Contact Persons meeting will be held in Dubrovnik, Croatia on 22nd March and, as usual, will be preceded by technical meetings for the various subfields to review progress in projects in mass, force, pressure, density and viscosity.

There will be also other meetings related to EMRP projects in progress (SIB05) and in negotiation (SIB63) and specific meetings for EURAMET projects (1205 “Review of EURAMET cg 18” and 1210 “Best practice of the dissemination of the kilogram”).

7. Issues

EURAMET Calibration Guidance Documents

The EURAMET Calibration Guide 18 “Guidelines on the Calibration of Non-Automatic Weighing Instruments” is under revision.

Concerns were expressed by some influential users that the document, which is being adopted also by other RMOs as mandatory, is too complicated and needs some further adjustment. As a consequence it was agreed to make an improved revision of the guide where harmonization was more achievable and solution to issues not covered before were provided.

This work is under EURAMET project 1205. A special meeting about this project will be held in Dubrovnik, Croatia on 19th March. In this meeting there will be participants not only from NMIs but from the industry which manufacturing non automatic weighing instruments. This

8. Outlook

Next period’s activity will be largely dominated by work on the kilogram redefinition, especially concerning its *mise en pratique*, and by EMRP-related work.
