

CSIR-NPL (India)

Establishment of testing facilities for Personal Protective Equipment

Currently, CSIR-NPL supports biomedical laboratories in India by providing certification services for infrared thermometers, blood pressure measuring instruments, ventilator testers, gas flow analyzers, infusion device analyzers, infusion pumps, defibrillators, etc. To further support the medical industries, hospitals and biomedical laboratories in the manufacture and testing of Personal Protective Equipment (PPE) such as face masks, gloves, hand sanitizers, ventilators, etc., CSIR-NPL is establishing complete testing facilities for such items.
