Recommendations for SIR comparisons

C. Michotte

In order to improve the KCRVs, the NMIs are kindly asked to submit the following radionuclides when possible, for the reasons expressed:

No KCRV yet defined:

⁴⁷Sc, ⁶⁴Cu, ¹¹³Sn, ¹⁴⁰Ba, ¹⁵⁵Eu, ¹⁹⁵Au, ²⁰⁷Bi, ²⁴³Am

Few primary results to define the KCRV:

²⁴Na, ⁵⁶Co, ⁵⁶Mn, ⁹⁹Mo, ¹⁰⁶Ru, ¹⁰⁹Cd, ¹²³I, ¹²⁴Sb, ¹⁵³Gd, ¹⁵⁴Eu, ²²²Rn

Large spread in the primary results used to define the KCRV:

⁵⁷Co, ⁶⁷Ga, ⁷⁵Se, ¹¹¹In, ¹⁶⁶Ho^m, ¹⁶⁹Yb
