

Economic and Social Impact of CIPM MRA

Success Cases in China

Case 1 Ericsson

Ericsson, the world-leading company providing services, software and infrastructure - especially in mobility, broadband and the cloud - are enabling the communications industry and other sectors to do better business, increase efficiency.

China has always been one of the most important markets of Ericsson for many years. In 2002, China became a global supply center of Ericsson out of three centers, the R&D investment in China by Ericsson has been increasing 30% per year ever since.

From 2001, the National Institute of Metrology (NIM) officially became the calibration service provider for Ericsson, annually reviewed by ISO 17025. Ericsson fully accepted the calibration service and certificates issued by NIM based on the CMCs recognized by the CIPM MRA.

NIM provides on-site and on-line calibration for Ericsson based on the particular needs of clients from communication sector. The services include: technical consulting, calibration, maintenance, training, etc. As of 2014, NIM has issued nearly 30000 calibration certificates for Ericsson, created significant economic benefit by avoiding tracing to other countries.
