- 2020 EURAMET-T.K9.1 bilateral comparison of ITS-90 SPRT calibration from the Hg TP to Zn FP
- 2019 An investigation into a calibration scheme for a light pipe based temperature probe
- 2015 Effect of changes in temperature scales on historical temperature data
- 2015 Traceable Calibration of a Radiation Thermometer in the Range 100 °C to 300 °C by Model Fitting
- 2016 Conformance assessment of electrical energy meters investigated by risk analysis – a case study
- 2017 Cryogenic flow rate measurement with a laser Doppler velocimetry standard
- 2020 Calibration of thermocouples from 419,527 °C (freezing point of Zn) up to 1492 °C (melting point of the Pd-C eutectic), by the temperature fixed point and comparison methods
- 2015 The MeteoMet project - metrology for meteorology: Challenges and results
- 2014 Comparison of Air Temperature Calibrations
- 2013 The “MeteoMet” project – metrology for meteorology
- 2011 Investigation of the Equivalence of National Dew-Point Temperature Realizations in the -50 °C to + 20 °C Range
- 2019 A new EMPIR Project “MetForTC” for Developing Traceable Measurement Capabilities for Monitoring Thermocouple Performance
