Helping the development of new cancer therapies and supporting environmental protection.

The International Bureau of Weights and Measures (BIPM) is an international organization established by the Metre Convention, through which Member States act together on matters related to measurement science and measurement standards.

The BIPM has a number of vacancies for short-term secondments in the Ionizing Radiation Department. Two types of secondment are available:
1) Contributing to the improvement of measurement techniques.
2) Working with BIPM staff to carry out and analyze comparison exercises, to learn about metrology at the international level.

Both are opportunities for career development, involve working with scientists from the BIPM and colleagues from national metrology institutes, helping to deliver the BIPM Work Programme and contributing to the international measurement system that underpins the safe use of ionizing radiation in healthcare and the nuclear industry.

About the Ionizing Radiation Department
The mission of the department is to support national metrology institutes in demonstrating the international equivalence of standards for radiation dosimetry and radioactivity. The department develops and maintains the technical infrastructure to enable comparisons of primary standards; it has a set of irradiation facilities and standards for dosimetry, access to a high-energy photon beam facility, a radiochemistry laboratory and a range of specialist radioactivity measurement systems (ionization chambers, liquid scintillation counters, gamma spectrometer, etc). It has a staff of nine scientists and specialist technicians.

Working on secondment at the BIPM
The BIPM offers a unique environment for a secondment. It is located in Sèvres, on the outskirts of Paris (France) and has an international staff of about 75. There is a wide range of accommodation available nearby, including furnished apartments. There is an excellent public transport network to central Paris and the international airports are in easy reach.

Terms and conditions
Applications are welcome from employees of a national measurement institute, a designated institute or an international organization such as the IAEA. You would not be employed by the BIPM and would remain an employee of your institute. The BIPM will normally pay an allowance to cover your additional living expenses. Help will be given in finding local accommodation for the duration of the secondment.

Experience needed
The experience needed depends on the project. A good level of English or French (spoken and written) is essential.
Secondments – 2023

Please contact the Department Director, Dr Vincent Gressier (Vincent.gressier@bipm.org) to discuss the project and confirm whether the secondment opportunity is still available. If you decide you would like to go ahead, please forward a copy of your CV so that the BIPM can confirm that the project would be suitable. The BIPM will then send a copy of a Secondment Contract which should be signed by the authorized person at your organization.

If the secondment opportunity is no longer available or the project is not suitable, the BIPM would be pleased to discuss opportunities for a secondment in the future.

*The duration of the project is flexible, to meet your requirements*
