

# CIPM - ILAC

## JOINT WEBINAR

## Digital Transformation in the context of Accreditation

### HIGHLIGHTS

- The SI Digital Framework – a common goal for interoperable digital data within the quality infrastructure
- Broad concept of digital reporting in an accreditation body
- Digital transformation in context of laboratories in industry
- Opportunities and challenges with the introduction of Digital Calibration Certificates
- Q&A session

*The webinar is aiming to set the scene on relevant uptake of activities by the International Accreditation Laboratory Cooperation (ILAC) underpinning requirements posed by an emerging and profound digital transformation of formats, methods, processes, and tools in measurement and the quality infrastructure.*

**Bureau**  
International des  
Poids et  
Mesures
