

**CCQM-K23.b and COOMET.QM-K23.b**

**Key comparison CCQM-K23.b**

**MEASURAND :** Amount-of-substance fraction of iso-Butane in Natural gas type II

**NOMINAL VALUE :** 0.008 mol/mol

**GAS MIXTURE :** Expressed in mol/mol: Nitrogen (0.07 mol/mol), Carbon dioxide (0.03 mol/mol), Ethane (0.094 mol/mol), Propane (0.034 mol/mol), *n*-Butane (0.01 mol/mol), iso-Butane (0.008 mol/mol), Methane (0.754 mol/mol)

$x_{\text{Lab}i}$  result of measurement carried out by laboratory *i*

$U_{\text{Lab}i}$  stated uncertainty of laboratory *i* at a 95 % level of confidence

$k_{\text{Lab}i}$  stated coverage factor

$x_{i\text{ref}}$  amount of substance fraction in the cylinder sent to laboratory *i*, from preparation

$u_{i\text{ref}}$  combined standard uncertainty of  $x_{i\text{ref}}$

$u_{i\text{ref}} = (u_{i\text{prep}}^2 + u_{i\text{ver}}^2)^{1/2}$  where  $u_{i\text{prep}}$  and  $u_{i\text{ver}}$  are the standard uncertainties of preparation and verification respectively for which the numerical values can be found in Table 9 of the Final Report.

## CCQM-K23.b and COOMET.QM-K23.b

### Key comparison CCQM-K23.b

**MEASURAND :** Amount-of-substance fraction of iso-Butane in Natural gas type II

**NOMINAL VALUE :** 0.008 mol/mol

**GAS MIXTURE :** Expressed in mol/mol: Nitrogen (0.07 mol/mol), Carbon dioxide (0.03 mol/mol), Ethane (0.094 mol/mol), Propane (0.034 mol/mol), *n*-Butane (0.01 mol/mol), *iso*-Butane (0.008 mol/mol), Methane (0.754 mol/mol)

**Key comparison reference value:** there is no single reference value for this comparison, the value obtained from preparation,  $x_{i\text{ref}}$ , is taken as the reference value for laboratory  $i$ .

The degree of equivalence of each laboratory  $i$  with respect to the reference value is given by a pair of terms:

$D_i = (x_{\text{Lab}_i} - x_{i\text{ref}})$  and  $U_i$ , its expanded uncertainty at a 95% level of confidence, both expressed in  $10^{-2}$  mol/mol;  
 $U_i = 2[(U_{\text{Lab}_i} / k_{\text{Lab}_i})^2 + u_{i\text{ref}}^2]^{1/2}$ , using a coverage factor  $k = 2$ .  $D_i$  and  $U_i$  are also given in relative terms.

The degree of equivalence between two laboratories is given by a pair of terms:  $D_{ij} = D_i - D_j = (x_i - x_{i\text{ref}}) - (x_j - x_{j\text{ref}})$  and

$U_{ij}$ , its expanded uncertainty at a 95% level of confidence, both expressed in  $10^{-2}$  mol/mol;  
 $U_{ij} = 2[(U_{\text{Lab}_i} / k_{\text{Lab}_i})^2 + (U_{\text{Lab}_j} / k_{\text{Lab}_j})^2 + u_{i\text{ref}}^2 + u_{j\text{ref}}^2]^{1/2}$ , using a coverage factor  $k = 2$ .

The pair-wise degrees of equivalence are not explicitly computed.

### Linking COOMET.QM.23.b to CCQM-K23.b

The pilot laboratory VNIIM is used as the linking laboratory. In order to link the results of COOMET.QM-K23.b to those of CCQM-K23.b, an uncertainty term is added to the standard uncertainty of the reference value,  $u_{i\text{ref}}$ , for the laboratory  $i$  participating in COOMET.QM-K23.b. This additional uncertainty term is equal to the absolute value of  $D_i$  obtained by VNIIM in CCQM-K23.b.

The degree of equivalence of a laboratory participant in COOMET.QM-K23.b with respect to the reference value is given by a pair of terms, both expressed in  $10^{-2}$  mol/mol:

$D_i = (x_{\text{Lab}_i} - x_{i\text{ref}})$  and its expanded uncertainty ( $k = 2$ ),  $U_i$ ,

with  $U_i = [U_{\text{Lab}_i}^2 + 2u_{i\text{ref}}^2 + D_{\text{VNIIM(CCQM-K23.b)}}^2]^{1/2}$ .

$D_i$  and  $U_i$  are also given in relative terms.

No pair-wise degrees of equivalence have been computed for participants in COOMET.QM-K23.b.

CCQM-K23.b and COOMET.QM-K23.b

**MEASURAND :** Amount-of-substance fraction of iso-Butane in Natural gas type II

**NOMINAL VALUE :** 0.008 mol/mol

**GAS MIXTURE :** Expressed in mol/mol: Nitrogen (0.07 mol/mol), Carbon dioxide (0.03 mol/mol), Ethane (0.094 mol/mol), Propane (0.034 mol/mol), *n*-Butane (0.01 mol/mol), *iso*-Butane (0.008 mol/mol), Methane (0.754 mol/mol)

Degrees of equivalence, offset  $D_i$ , and expanded uncertainty ( $k = 2$ )  $U_i$ , expressed in  $10^{-2}$  mol/mol, and given in relative terms (%)
