The first measurement results made by these laboratories have not been used in the final results.

Key comparisons CCEM-K5, EUROMET.EM-K5, EUROMET.EM-K5.1 and SIM.EM-K5

MEASURAND : Electric power at 120 V, 5 A, 53 Hz **POWER FACTOR : 1.0, 0.5 Lead, 0.5 Lag, 0.0 Lead, 0.0 Lag**

Key comparison CCEM-K5

For each power factor, the key comparison reference value, x_R, is calculated as the weighted mean of the difference between laboratory i and the predicted value, based on measurements performed at the pilot laboratory. Its standard uncertainty, u_R, is calculated as the uncertainty of the weighted mean of the differences.

Power factor	x_R / (μW/VA)	u_R / (μW/VA)
1.0	7	5
0.5 Lead	-1	5
0.5 Lag	-1	5
0.0 Lead	0	5
0.0 Lag	-3	5

The degree of equivalence of each laboratory with respect to the key comparison reference value is given by a pair of terms: D_i and U_i, its expanded uncertainty (k = 2), both expressed in μW/VA. The derivation of these terms can be found in the CCEM-K5 Final Report.

The degree of equivalence between two laboratories is given by a pair of terms: D_{ij} and U_{ij}, its expanded uncertainty (k = 2), both expressed in μW/VA. The derivation of these terms can be found in the CCEM-K5 Final Report.

Linking EUROMET.EM-K5 and EUROMET.EM-K5.1 to CCEM-K5

For each power factor the linkage between EUROMET.EM-K5 and CCEM-K5, or EUROMET.EM-K5.1 and CCEM-K5, is computed as explained in the corresponding Linkage Report.

The INRIM, NPL and PTB ensure the linkage between EUROMET.EM-K5 and CCEM-K5, and PTB between EUROMET.EM-K5.1 and CCEM-K5

Linking SIM.EM-K5.1 to CCEM-K5

It was possible to link SIM.EM-K5 results to those of CCEM-K5 for the power factors 1.0, 0.5 Lead and 0.5 Lag as explained in the Addendum to the SIM.EM-K5 Final Report.

NIST, NRC, INTI, INMETRO and CENAM ensure the linkage.

It follows that the tables of degrees of equivalence relative to the key comparison reference values and the graphs of equivalence obtained for CCEM-K5 can be extended to include results from the EUROMET.EM-K5, EUROMET.EM-K5.1 and SIM.EM-K5 participants. The full matrices of equivalence are given here for CCEM-K5 and EUROMET.EM-K5 only.
Pair-wise degrees of equivalence involving EUROMET.EM-K5.1 participants are available in Tables 6.1 to 6.5 of the EUROMET.EM-K5.1 Linkage Report.

Key comparisons CCEM-K5, EUROMET.EM-K5, EUROMET.EM-K5.1 and SIM.EM-K5
