Articles Relevant to the Expression of Uncertainty in Measurement

The following citations are for information purposes but are not necessarily endorsed by the members of JCGM/WG 1. This compilation is not meant to be exhaustive.

1992

**Propogation of Variance in Dew Point and Psychrometer Humidity Gauges**

G.D. Chapman  
National Research Council of Canada, Ottawa, Canada  

1993

**Uncertainty Modelling in Mass Comparisons**

W. Bich, M.G. Cox and P.M. Harris  
Istituto di Metrologia "G. Colonnetti", Turin, Italy  

1995

**A Bayesian Theory of Measurement Uncertainty**

K. Weise and W. Wöger  
Physikalisch-Technische Bundesanstalt, Braunschweig, Germany  

1995

**Statistical Descriptors in Crystallography. II. Report of a Working Group on Expression of Uncertainty in Measurement**

D. Schwarzenbach et al  
Working Group of the International Union of Crystallography Commission on Crystallographic Nomenclature  
1996

Simple Formula for the Propagation of Variances and Covariances

W. Bich
Istituto di Metrologia "G. Colonnetti", Turin, Italy

1997

Metrological timelines in traceability

C.D. Ehrlich and S.D. Rasberry
Technology Services, National Institute of Standards and Technology, Gaithersburg, USA

A Distribution-Independent Bound on the Level of Confidence in the Result of a Measurement

Tyler W. Estler
National Institute of Standards and Technology, Gaithersburg, USA

The Evaluation of Standard Uncertainty in the Presence of Limited Resolution of Indicating Devices

Ignacio H. Lira and Wolfgang Wöger
Pontificia Universidad Católica de Chile, Santiago, Chile; Physikalisch-Technische Bundesanstalt, Braunschweig, Germany

Uncertainty Analysis of Three-Dimensional Coordinate Measuring Machines

Jiro Matsuda
National Research Laboratory of Metrology, Tsukuba, Japan

Guidelines for Expressing the Uncertainty of Measurement Results Containing Uncorrected Bias

Steven D. Phillips, Keith R. Eberhardt and Brian Parry
National Institute of Standards and Technology, Gaithersburg, USA; Boeing Corporation, Seattle, USA.
Uncertainty Treatment in Monte Carlo Simulation
K. Weise and H. Zhang
Physikalisch-Technische Bundesanstalt, Braunschweig, Germany

1998

Uncertainty Analysis for Angle Calibrations using Circle Closure
Tyler W. Estler
National Institute of Standards and Technology, Gaithersburg, USA

Assessing Uncertainty in Measurement
Leon Jay Gleser
University of Pittsburgh, Pennsylvania, USA

Evaluation of the Uncertainty Associated with a Measurement Result not Corrected for Systematic Effects
Ignacio H. Lira and Wolfgang Wöger
Pontificia Universidad Católica de Chile, Santiago, Chile; Physikalisch-Technische Bundesanstalt, Braunschweig, Germany

The Evaluation of the Uncertainty in Knowing a Directly Measured Quantity
Ignacio H. Lira and Wolfgang Wöger
Pontificia Universidad Católica de Chile, Santiago, Chile; Physikalisch-Technische Bundesanstalt, Braunschweig, Germany

Least-squares Estimation using Lagrange Multipliers
Lars Nielsen
Danish Institute of Fundamental Metrology, Lyngby, Denmark

Calculation of Measurement Uncertainty Using Prior Information
S. D. Phillips et al.
National Institute of Standards and Technology, Gaithersburg, USA
Confidence-interval Interpretation of a Measurement Pair for Quantifying a Comparison
Barry M. Wood and Robert J. Douglas
National Research Council of Canada, Ottawa, Canada

A Practical Model for Uncertainty Evaluation in Force Measurements
C. Xu
National Measurement Centre, Singapore

1999

Measurement as Inference: Fundamental Ideas
Tyler W. Estler
Precision Engineering Division, National Institute of Standards and Technology, Gaithersburg, USA

Uncertainty of Measurement and Error Limits in Legal Metrology
W. Schulz and Klaus-Dieter Sommer
Physikalisch-Technische Bundesanstalt, Braunschweig, Germany; Landesamt für Mess- und Eichwesen Thüringen, Ilmenau, Germany

Comments on the Accuracy of Some Approximate Methods of Evaluation of Expanded Uncertainty
D. Turzeniecka
Technical University of Poznań, Poznań, Poland

Quantifying Demonstrated Equivalence
Barry M. Wood and Robert J. Douglas
National Research Council of Canada, Ottawa, Canada
2000

**Limitations of the Welch-Satterthwaite Approximation for Measurement Uncertainty Calculations**

M. Ballico  
CSIRO National Measurement Laboratory, Lindfield, Australia  
Metrologia, 2000, **37**, 61-64.

**Evaluation of Measurement Uncertainty in the Presence of Combined Random and Analogue-to-digital Conversion Errors**

Clemens Elster  
Physikalisch-Technische Bundesanstalt, Berlin, Germany  

**Cycles of Comparison Measurements, Uncertainties and Efficiencies**

Michael Gläser  
Physikalisch-Technische Bundesanstalt, Braunschweig, Germany  

**The Development of a Six-component Force/moment Sensor Testing Machine and Evaluation of its Uncertainty**

Gab-Soon Kim  
Gyeongsang National University, Kyungnam 660-701, Republic of Korea  

**Propagation of Errors for Matrix Inversion**

M. Lefebvre et al.  
Department of Physics and Astronomy, University of Victoria, Victoria, Canada  

**An Approach to Combining Results from Multiple Methods Motivated by the ISO GUM**

M. S. Levenson et al.  
National Institute of Standards and Technology, Gaithersburg, USA  

**Curve adjustment by the least-squares method**

I. Lira  
Metrologia, 2000, **37**, 677-681.
Uncertainty and Traceability in Calibration by Comparison
Emmanouil Mathioulakis and Vassilis Belessiotis
NCSR 'Demokritos', Agia Paraskevi Attikis, Greece

Possible Advantages of a Robust Evaluation of Comparisons
Jörg W. Müller
Bureau International des Poids et Mesures, Sèvres, France

Uncertainty Evaluation of a Primary Shock Calibration Method for Accelerometers
K. Ueda, A. Umeda and H. Imai
National Research Laboratory of Metrology, Umezono, Tsukuba, Japan
Metrologia, 2000, 37, 187-197.

Removing Model and Data Non-Conformity in Measurement Evaluation
K. Weise and W. Wöger
Parkstrasse 11, D-38 179 Schwülper, Germany; Physikalisch-Technische Bundesanstalt, Braunschweig, Germany

The Propagation of Uncertainty on Interpolated Scales, with Examples from Thermometry
D. R. White and P. Saunders
Measurement Standards Laboratory of New Zealand, Industrial Research Ltd, Lower Hutt, New Zealand
Metrologia, 2000, 37, 285-293.

Accuracy of Error Propagation Exemplified with Ratios of Random Variables
Peter J. Winzer
Technische Universität Wien, Vienna, Austria
2001

*Calibration of Impedances by the Substitution Method: Numerical Uncertainty Evaluation*

L. Callegaro and W. Bich  
Istituto Elettrotecnico Nazionale Galileo Ferraris, Turin, Italy; Istituto di Metrologia Gustavo Colonnetti, Turin, Italy  

*Uncertainty contributions from mismatch in microwave measurements*

T. Guldbrandsen  
Technical University of Denmark, Lyngby, Denmark  

*Does "Welch-Satterthwaite" Make a Good Uncertainty Estimate?*

B. D. Hall and R. Willink  
Measurement Standards Laboratory of New Zealand, Lower Hutt, New Zealand; Applied Mathematics Centre, Industrial Research Ltd, Lower Hutt, New Zealand  

*Evaluation of cycles of comparison measurements by a least-squares method*

I. Lira  

*The Propagation of Uncertainty with Non-Lagrangian Interpolation*

D. R. White  
Measurement Standards Laboratory of New Zealand, Industrial Research Ltd, Lower Hutt, New Zealand  

2003

*On use of Bayesian statistics to make the Guide to the Expression of Uncertainty in Measurement consistent*

R. Kacker and A. Jones  
National Institute of Standards and Technology, Gaithersburg, USA  
Quality assurance of qualitative analysis in the framework of the European project ‘MEQUALAN’

A. Ríos et al.

The European Commission has supported the G6MA-CT-2000-01012 project on “Metrology of Qualitative Chemical Analysis” (MEQUALAN), which was developed during 2000-2002.
